

**METHOD AND APPARATUS OF ADAPTIVE
INTEGRATION ACTIVITY MANAGEMENT FOR
BUSINESS APPLICATION INTEGRATION**

ABSTRACT OF THE DISCLOSURE

5 An adaptive integration activity management framework for on
demand business process integration provides a mechanism to enable easy
integration of legacy and new applications. The framework minimizes the
effort need to integrate a new application into an existing business process
environment such that the new activity is a “plug-in” into an action manager
10 by implementing a standard adaptation layer. Activity integration is
implemented in the principle of “on-demand” because it is invoked as
required, so the communication and collaboration between partners become
much more flexible.
